guatnojohnroven@gmail.com ❖ +63 969 293 0260 ❖ Botolan, Zambales, Philippines ❖ linkedin.com/in/rovenguatno

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in software engineering, web development, automation, and blockchain application development through academic projects and a software development internship. Proficient in Python, PHP, JavaScript, Selenium, Streamlit, and Hyperledger Fabric, with experience developing web applications, desktop software, and workflow automation tools. Passionate about building secure, scalable, and user-focused software while continuously learning modern technologies and best practices.

WORK EXPERIENCE

Software Developer Intern (On-The-Job Training)

Jan 2026 – May 2026

Zambales I Electric Cooperative Inc. (ZAMECO I)

Palauig, Zambales, Philippines

- Developed 2 internal web applications using Python and Streamlit to improve document accessibility and support daily office operations.
- Automated the collection of ERC and NEA regulatory documents by developing Python and Selenium web scraping solutions, reducing repetitive manual data gathering.
- Performed system testing, debugging, and feature enhancements across multiple applications, improving software stability and user experience.

Office Reminder System

Feb 2026 – Apr 2026

Python Developer

- Developed a web-based office reminder system using Python and Streamlit that delivered real-time notifications to employees requesting required document or task submissions.
- Implemented 4 key features: task assignment, instant notifications, submission status tracking, and deadline reminders to streamline office workflows.
- Built separate interfaces for senders and recipients, enabling efficient request management and monitoring of pending and completed submissions.

ERC & NEA Document Management System

Mar 2026 – May 2026

Full-Stack Web Developer

- Developed a responsive web application using HTML, CSS, JavaScript, and Vite to centralize ERC and NEA regulatory documents.
- Implemented 3 key document management features: search, filtering, and document organization for faster information retrieval.
- Designed a responsive user interface that simplified document navigation and improved overall accessibility.

Web Scraper Desktop Application

Mar 2026 – May 2026

Python Automation Developer

- Developed a cross-platform desktop application using Electron.js, Python, and Selenium to automate data extraction from multiple websites.
- Integrated 3 automated processes: web navigation, data parsing, and data export to streamline information collection.
- Built configurable settings, progress tracking, and error handling features to improve reliability and user experience.

ADDITIONAL PROJECT

Hyperledger Fabric with RAFT Consensus for SSG Electronic Voting System

Nov 2025

Backend & Blockchain Developer

Thesis

- Developed a blockchain-based electronic voting system using Hyperledger Fabric with RAFT consensus, integrating 3 core security features: voter authentication, role-based access control, and vote validation.
- Built a responsive web interface for administrators and voters, streamlining the election process from voter verification to vote submission.
- Implemented immutable blockchain vote storage to enhance election transparency, integrity, and resistance to tampering.

EDUCATION

Bachelor of Science in Computer Science

2022 – July 2026

President Ramon Magsaysay State University – Iba Campus

Iba, Zambales, Philippines

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, HTML5, CSS3

Frameworks & Tools: REST APIs, Streamlit, Electron.js, Hyperledger Fabric, Selenium, Git, GitHub

Databases: MySQL, MongoDB

AWARDS

- Academic Distinction — President Ramon Magsaysay State University, Iba Campus (2026)
